

INDEX

	<i>Paragraph</i>
Acceptance criteria	5-2, 6-2, 9-2
All other buildings	1-4b, 1-5c
Alternatives	1-4b, 5-2c, 6-3
Analysis procedures	5-3f
Annualized costs	7-4, 7-6
Approval authorities	1-2
Architectural elements	9-3, 9-6a
Available design data	3-2b
Base isolation	6-3a
Base shear	4-2c(4)(a)
Basic Design Manual (BDM)	1-1
Basis of Design	6-6a, 8-3a
Bibliography	1-8
Capacity	4-2c, 4-2d, 5-3d, 7-3a
Capacity Spectrum Method	4-2c, 4-2d
Communications	1-5a(5), 9-6c(5)
Compatibility	6-3a
Concepts	1-7e, 6-3, 6-6
Concrete	6-4b(2,3,4)
Configuration	6-3a
Conforming materials	5-2a
Conforming systems	5-2a
Connections	6-4b(1)(d)
Contract documents	1-7g, 8-3
Cost benefits	1-7f, Chap 7
Costs	4-2e, 6-3f, 7-5, 7-7
Damage	4-2d, 6-3e, 9-3b
Damageability	7-3
Damping Ratio	4-2d(2)(b)
Deficiencies	5-3g, 6-4c
Definitions	1-3
Demand	4-2d, 5-3d
Design data	3-2b
Detailed structural analysis	1-7d, Chap 5
Diaphragms	5-3g(3)(b), 6-3a, 6-4b(7)
Document review	4-2a, 5-3a
Drawings	8-3b
Drift	5-2a, 6-3a(7)
Dynamic analysis procedures	5-3f, 9-5
Earthquake risk	7-2
Electrical elements	9-3
Elevators	9-6c(1)
Emergency power	9-6c(2)
Energy dissipation	6-3a
EQ-I	1-4a 6-3e
EQ-II	1-4a
Equipment	5-3g(3)(d), 9-6b
Essential facilities	1-5a
Evaluation	1-6c, 1-7, 4-2, 5-3f, 9-4, 9-5
Existing facilities	1-6b 1-7, 2-1
Existing materials	1-6c, 1-7i, 5-2a, 5-2b, 5-3c, 6-3a(5)(d), 6-4a
Field survey	3-2c, 4-2b
Final design	1-7g, Chap 8, 8-2

Fire protection systems	9-6c(3)
Foundations	5-3g(3)(a), 6-3a, 6-4b(8)
Hazard risk levels	1-4
Hazardous buildings	1-5
Hazardous critical facilities	1-5d
Hazardous materials	1-5d, 9-6c(4)
High risk facilities	1-4b
Inelastic demand ratio	5-3f(1), 6-3a(6)
Inspection survey	3-2c, 4-2b
Inventory	2-2
Inventory reduction	1-7a, Chap 2, 2-3
Lateral displacement	4-2c(4)(b)
Lateral force	4-2c(1)
Masonry	6-4b(3,4)
Mechanical elements	9-3, 9-6b
Method 1: elastic analysis procedure	5-31(1)
Method 2: capacity spectrum method	4-2c, 5-3f(2)
Methodology	1-7
Mission-essential	1-5a(4)
Nonconforming materials	5-2b
Nonconforming systems	5-2b
Nonessential	1-5c
Nonstructural elements	1-7h, 6-5, Chap 9
P-delta effects	5-3g(3)(f)
Periods of vibration	4-2c(4)(c), 4-2d
Plot plan	3-3e
Post-yield analysis	5-2
Preliminary evaluation	1-7c, Chap 4, 4-2
Preliminary screening	1-7b, Chap 3, 3-2
Priorities	4-2d(6), 4-3
Rapid evaluation technique	4-2c
Rapid seismic analysis	4-1, 4-2c, 9-4e
Reanalysis	6-3d
Recommendations	5-4
Repair costs	7-3b
Reports	3-3, 4-4, 5-2b(1), 7-8
Response spectra	4-2d, 7-2b
Risk levels	1-4, 4-2d(2)(a)
RSAP	4-1b
Screening process	2-1, 3-2, 3-2d
Seismic design criteria	1-6a
Seismic Design Guidelines (SDG)	1-1, 1-6a
Seismic evaluation	1-7
Site visits	3-2a, 3-2c, 4-2b, 5-3b, 9-4b
Spectral accelerations, S_a	4-2c(5), 4-2d
Spectral displacements, S_d	4-2c(5), 4-2d
Steel	6-4b(1)
Strengthening techniques	6-3b, 6-4
Structural systems	5-2a, 5-2b(1), 6-3a
Symbols	1-3
Testing	1-7i, 5-3c
Torsion	6-3a(4)
Tripartite plots	4-2d
Two-level procedure	1-6a
Upgrading	1-6c, 1-7, 6-5, 7-5, 9-6
Useful life	7-4b
Wood	6-4b(5)
